

260 GT Plus

260 GT Plus® is a high octane, highly oxygenated unleaded race fuel. Because 260 GT Plus contains more oxygen than is allowed in pump gas, it is for off-road and racing use only. However, it will not harm oxygen sensors. Due to its high oxygen content, an increase in fuel flow is required to utilize the full potential of 260 GT Plus compared to conventional non-oxygenated fuels. Sunoco 260 GT Plus contains additives to enhance shelf life and promote engine cleanliness. As with any gasoline, it should be stored in opaque, tightly sealed containers and kept where temperatures are stable. Properly stored, the shelf life of 260 GT Plus is in excess of 1 year. *Note: exposure to sun light (ultraviolet light) can degrade the octane of this fuel and must be avoided. Contains octane boosting additive, MMT.*

Maxwell Oil RACE FUELS

DISCLAIMER:
Legal in California only for racing vehicles in sanctioned racing events.

LEGAL:
For off-road and racing applications only.

TECHNICAL DETAILS

Color	Aqua Green
Octane (R+M)/2	104
Research Octane	110
Motor Octane	98
Specific Gravity	0.761
Weight (lbs/gallon)	6.3
Reid Vapor Pressure	61
10% Evaporation	148
50% Evaporation	212
90% Evaporation	233
Stoichiometric Air/Fuel Ratio	13.7
Oxygen (Weight%)	4.7
Ethanol (Volume%)	13
HC Ratio	1.867
OC Ratio	0.043
Lower Heating Value (Btu/Pound)	17400
Lower Heating Value (Btu/Gallon)	110300
Leaded	No

APPLICATIONS

Asphalt Oval

Boats and Personal Watercraft

Dirt Oval

Drag

Karts

Miscellaneous Nitrous, Superchargers, Turbochargers

Motorcycle Road Course

Off-Road

Off-Road Motorcycle and ATV

Rally

Road Course

SANCTIONING BODIES

The Sweeney RUSH Sprint Late Model Series
